

Explosion-Proof Crawler Robot - D071

■ Product Overview

This model adopts an efficient tracked system that offers greater adaptability to complex terrains compared with wheeled structures. With its large ground contact ratio and specially designed track pattern, it can operate effectively in extreme conditions such as severe cold, rain and snow, slippery surfaces, and rugged mountainous terrain, offering excellent adaptability across multiple climates and terrains. Its internal sensing and control systems feature a modular design — independent yet efficiently coordinated, maintaining highly stable and reliable operation performance.
