

Explosion-Proof Wheeled Robot - SGLS-C3

Product Overview

This model adopts a modular design, allowing flexible integration of various devices to meet the needs of different application scenarios. It provides inspection functions for detecting leaks, ensuring equipment and personnel safety, monitoring site conditions, and assessing equipment operating and abnormal states, further reducing potential safety risks. Equipped with an ultrasonic omnidirectional anti-collision and trench-fall prevention system, it enhances the safety of both factory equipment and personnel. An optional AI industrial control unit enables millisecond-level recognition and response, delivering multidimensional performance upgrades that make inspections safer and more reliable.
