

Explosion-Proof Firefighting Robot

■ Product Overview

The robot integrates fire suppression and reconnaissance functions and is equipped with a fire monitor and environmental sensing systems. The robot is equipped with a dual water curtain cooling system, enabling it to replace firefighters in entering hazardous fire areas. Equipped with a crawler chassis that provides explosion-proof safety, strong obstacle-crossing ability, and high towing power, it can remotely control the fire monitor for rotation, elevation, and oscillating sweep, offering multiple spray modes with switchable water and foam, greatly improving rescue safety and reducing personnel risk.
