

Explosion-Proof Firefighting Reconnaissance Robot — QT04

SevniceRobotics

Product Overview

Combining firefighting and reconnaissance functions, this tracked robot carries a fire-monitoring water cannon and environmental sensing devices, with a dual water-curtain spray and cooling system that lets it enter hazardous areas in place of firefighters. Its tracked chassis delivers strong explosion protection, obstacle-climbing, and towing capacity, with remote-controlled cannon rotation, tilt, and sweep across multiple spray modes — switching freely between water and foam.

Features and Capabilities

Dimensions	≤ 1700 × 900 × 1250 mm (L×W×H)	Climbing Ability	≤ 90%
Weight	≤ 850 kg (subject to actual product)	Obstacle Crossing Height	≤ 30 cm
Explosion-Proof Rating	Ex IIB T6 Gb	Wading Ability	≤ 50 cm
Protection Rating	IP66	Charging Time	≤ 6 h
Drive Method	Dual Crawler Drive	Continuous Working Time	Water spray 5 h, walking 1.5 h
Braking Distance	≤ 0.3 m	Fire Monitor Performance	Flow ≤ 80 L/s, range ≤ 80 m
Straight-Line Speed	0–1.5 m/s	Remote Control Distance	≤ 1000 m

Standard Features

Remote Fire Suppression	Gas Detection	Spray Cooling
Video Collection	Two-Way Communication	Redundant Communication
Audio-Visual Alarm		

■ Optional Functions

Lifting Gimbal

Automatic Dehydration Belt

Internet Function
